

Cefic-LRI 12th Annual Workshop 2010 *Reduction of Uncertainty Enabling Decision Making*

Brussels, 17-18 November
Radisson Blu Royal Hotel

Registration is now open!

LRI
The Long-range
Research initiative

The Long-Range Research Initiative Programme (LRI) of the European Council for the Chemical Industry (Cefic) are organising a workshop to showcase results and outcomes of several LRI projects completing in 2009-2010.

The workshop will focus on the key areas of exposure, human biomonitoring, omics tools, endocrine disruption, children health, carcinogenicity, and societal acceptance of new technologies.

The objective of the workshop is to show scientists, academia, regulators, members and stakeholders the value that the LRI Programme has created and introduce its future direction.

**For more information and registration, visit the LRI website:
www.cefic-lri.org**

Reasons to attend

New perspectives: Find out how the chemical industry integrates health, environmental and societal concerns into innovation strategies.

Networking: Interactive sessions will give each delegate the opportunity to discuss and debate with experts from various disciplines.
