Environmental
Studies, Japan

Long-Range
Research Initiative

Meeting the Global Challenge of Applying New Scientific Methods to Improve Environmental and Human Health Risk Assessments

Recent advancements in new technologies for chemical safety assessment offer considerable promise to improve the scientific foundation of, and increase efficiency in, risk assessments. This workshop will focus on increasing understanding of new methods and building confidence in the use of the new technologies and their data streams for chemical safety assessments and for decision making.

The International Council of Chemical Associations' Long-Range Research Initiative (ICCA-LRI) and the National Institute of Health Sciences (NIHS) invite you to attend this year's workshop. The annual ICCA-LRI workshops bring together international representatives from industry, academia, and governmental and non-governmental organizations to address issues of mutual interest in chemical safety. The workshop agenda will include plenary speakers, panel discussions, and a poster session highlighting relevant research.

Registration will be opening soon! For more information, please contact the ICCA-LRI Workshop Coordinator at LRI_Workshops@icfi.com

Join us one day early,
June 14, for Pre-Workshop
Educational Sessions!

The workshop will feature four concurrent sessions:

- ▶ **Session 1:** New Approaches for Weight-of-Evidence Decision Making for PBTs and POPs Compared to Criteria-Based Approaches
- ▶ **Session 2:** Emerging Environmental Issues: Case Studies and Solutions Catalyzed by International Cooperation
- ▶ **Session 3:** Challenges in Read-Across and Building Confidence for Use in Decision Making
- ▶ **Session 4:** Enhancing Integration of Mechanistic Understanding in Epidemiology to Better Determine Causality

Awaji Island, Japan – Tucked away in the heart of Japan's Hyōgo Prefecture, this gem of an island offers beautiful floral countrysides, breathtaking beaches, and a wealth of centuries-old traditions. Stroll through a modernist Water Temple, marvel at the world's longest suspension bridge, or enjoy the 500-year old art of puppet theater. We hope you can enjoy this charming destination!
